

Simple Steps to Reading Personal Care Product Labels

Sarah Evans, PhD, MPH
Icahn School of Medicine at Mount Sinai

Steps you can take to improve the safety of your products:

- Read labels and beware of “greenwashing”.
- Use fewer products whenever possible.
- Avoid aerosol sprays and loose powders.
- Make your own cleaners with baking soda, vinegar, and lemon juice
- Opt for fragrance free.
- Support companies that are reducing the use of toxic chemicals in personal care products.
- Support research on the effects of common chemicals.
- Support the Safe Chemicals Act.
- Utilize your social networks to educate others!
- **Some key ingredients to avoid:**
 - Phthalates (not on the label – avoid fragrance/parfum)
 - Triclosan
 - Parabens
 - Formaldehyde (also formed from Quaternium-15, DMDM Hydantoin, Diazolidinyl Urea and Imidazolidinyl Urea)
 - 1,4-dioxane (not on the label - avoid sodium laureth sulfate, cetareth, polyethylene glycol/PEG)

- DEA (diethanolime) compounds
