# Breast Cancer Prevention Grand Challenge

A nighttime photograph of a cityscape, likely San Francisco, featuring a prominent clock tower (the Golden Gate Tower) on the left, a bridge (the Golden Gate Bridge) in the middle ground, and a body of water (San Francisco Bay) in the foreground. The scene is illuminated with warm orange and yellow lights from the buildings and bridge, and cooler blue and purple lights from the water and sky.

Do you want to get fresh ideas or find new approaches to breast cancer prevention?  
Join the Challenge as a co-sponsor to energize research priorities and create grassroots campaigns.

## The Challenge

We are looking for ideas that set a pioneering path to prevent and end breast cancer.

This Grand Challenge is not only for breast cancer researchers.

It is for advocates, survivors, the general public, non-profit organizations, technology companies, and researchers, whether they are within or outside of the field of breast cancer.

We believe in democratizing innovation in breast cancer prevention by tapping into the talent from all audiences, leveraging multidisciplinary research perspectives and diverse experiences to prevent breast cancer.

We want your input. Want to learn more? Want to submit an idea? Click [Learn More](#) above.
